

Splitcoin Codebook

Date Generated: 4-2-2024

Instructions: For each word position(ex: Word #1, Word #2, etc.), scroll through the codebook to find your numeric code. Each word position will have a unique list of word/value pairs. Write down the word for each numeric code on a piece of paper to reconstruct your original seed phrase. Use the PDF bookmarks to quickly jump to a specific word position.

WARNING: We do not recommend storing this file online. When this file is generated in the Splitcoin app, it will be encrypted using PDF 2.0, which uses AES-256. Either print it out or keep it on an offline storage device and store it securely. Also, do not use the 'Find' tool and type any of your seed words into your device! Splitcoin is designed so that you never have to type your seed phrase into a device!

Word #1

1	quick	2	olive	3	around	4	mystery	5	health	6	write	7	unit	8	spray
